PROFESSIONAL PROFILE

My background spans frontend, backend, UX and generative AI -- because I want to understand the product as a whole. Before development, I led teams, worked in sales, and built a career in design and illustration. Today I apply that same logic to code: understand the problem, think through the solution, execute it well -- with technical judgment, visual sensibility, and the ability to communicate across teams.

Completed Frontend and Backend careers at ADA ITW simultaneously, currently building agentic AI systems with LangChain and LangGraph and serving as AI Tutor at Samsung Innovation Campus 2026 -- oriented toward the AI Engineer path. I built Trece Art Studio -- my design, illustration and web development studio with over 3 years of real client work, including Cementerio de Libros (1.7M Instagram followers). Ready to contribute from day one.

SKILLS

Frontend: JavaScript ES6+ | HTML5 | CSS3 | DOM | Async/Await | Fetch API | REST APIs | Flexbox | Grid | SCSS | Responsive Design | Bulma CSS | Vite | React | JSX | Hooks | Context API | Styled Components

Backend: Node.js | Express.js | TypeScript | OOP | REST API | CRUD | JWT | Middlewares | Zod | CORS | bcrypt | MVC | UUID | File System | Postman | Render

AI & Agents: LangChain | LangGraph | Agentic AI | Stateful Graphs | Conditional Routing | Prompt Engineering | Chain of Thought | RISE | TAG | LLMs | Gemini API | Claude API | OpenAI API | SQLite

Data & ML: Python | NumPy | Pandas | Matplotlib | Data Visualization | Supervised Learning | Linear Algebra for AI | Statistics | Streamlit

Automation: Make (Integromat) | n8n | Workflow Automation [in progress]

Tools: Git | GitHub | Netlify | Vercel | Railway | Render | Figma | Adobe Illustrator | Canva

Soft skills: Team Leadership | Technical Tutoring | Client Management | Visual Communication | Problem Solving | UX Design

In progress: MySQL | MongoDB | Sequelize | Firebase | API Security | OWASP

PROJECTS

01 AI Contact Assistant -- Trece Art Studio | In development

Python | LangChain | LangGraph | Gemini API | SQLite | Streamlit | github.com/camilachirinocastell/ai-contact-assistant-trece-art-studio

- Stateful AI agent built with LangGraph that classifies incoming client inquiries and dynamically routes them toward a commercial proposal or a polite rejection, based on graph state
- Extracts metadata (service type, urgency, definition level) from each message and persists qualified leads in SQLite
- Evolved from a 5-prompt Chain of Thought (2025) to a full agentic architecture with conditional routing and stateful graph -- demonstrates progression from prompt chaining to native AI agent design
- Streamlit web interface in progress -- live URL coming soon

02 Portfolio Backend API | Live

TypeScript | Node.js | Express | JWT | bcrypt | Zod | MVC | Render | portfolio-backend-oypt.onrender.com | github.com/camilachirinocastell/portfolio-backend

- REST API for managing a professional services catalog with public read access and protected write operations
- Layered architecture: routes -> controllers -> services -> FileRepository -- each layer with a single responsibility
- JWT authentication with bcrypt password hashing, Zod validation middleware, global error handler, deploy on Render
- Full Postman collection: documenter.getpostman.com/view/58034286/2sBYAxPox9

03 Library Management System | Completed

JavaScript | Node.js | MVC | File System | TCP Server | github.com/camilachirinocastell/library-management-system

- Data structures, search and sorting algorithms (bubble sort, linear search), loan management system with MVC pattern
- Node.js backend with TCP server architecture and JSON data persistence
- Advanced array methods: .map(), .filter(), .reduce() for statistical reports and data normalization

04 Superheroines & Friends | Live

JavaScript ES Modules | SCSS | Fetch API | REST API | [superheroines-and-friends.vercel.app](#) | [github.com/camilachirinocastell/superheroines-and-friends](#)

- Consumes the Superhero API with search, filters, pagination (20/page) and character modal with full stats
- Custom "superheroine-first" sort logic using .sort() on appearance.gender -- a deliberate UX decision for representation without excluding any character
- SCSS architecture with partials, ES Modules structure and fully responsive design

05 Personal Portfolio | Live

HTML | CSS | JavaScript | [camilachirinocastell-portfolio.netlify.app](#) | [github.com/camilachirinocastell/camilachirinocastell-portfolio](#)

- Fullpage scrolling, dark/light mode toggle, Google Analytics integration
- Technical walkthrough recorded at ADA ITW (April 2026) with instructor feedback: [youtu.be/SPDXiJTXdnU](#)

06 Fullstack App -- React + Node.js + Databases | Coming soon

React | Hooks | Context API | Styled Components | Node.js | Express | TypeScript | MySQL | MongoDB | Sequelize | Firebase | API Security | OWASP

- Full-stack application with React SPA frontend connected to a secure backend with relational and non-relational databases
- Authentication, ORM integration and OWASP security standards

EXPERIENCE

AI Tutor | Samsung Innovation Campus 2026 | ADA ITW

Jun 2026 -- Nov 2026 | Cordoba, Argentina | Remote

- Supporting a cohort of 60 students through Generative AI, Prompt Engineering, Ethics in AI, Mathematics for Data Science, NumPy, Pandas and Machine Learning modules
- Facilitating understanding of complex technical concepts: linear algebra for AI, vector operations, similarity measures and supervised learning
- Applying pedagogical skills from History teaching background to break down abstract mathematical and AI concepts into accessible explanations

Web Developer & Generative AI | Trece Art Studio | Self-employed

2023 -- Present | Cordoba, Argentina | Remote

- Frontend and backend projects under my independent design, illustration and web development studio
- Applied Prompt Engineering (RISE, TAG, Chain of Thought) to real business use cases
- Designed a 5-prompt Chain of Thought system for client contact automation -- evolved into a LangGraph agentic architecture in 2026

Content Manager & Illustrator | Cementerio de Libros | Freelance

Dec 2023 -- Present | Colombia | Remote

- Illustration and content for a reading community with over 1.7 million Instagram followers
- Monthly original hand-drawn illustrations and digital design for the Book Cemetery Reading Club

Tools: Adobe Illustrator | Photoshop | Figma | Canva

Sales Leader & Team Supervisor | Independent | Multiple industries

Mar 2018 -- Dec 2025 | Cordoba, Argentina

- Led and supervised teams of 10-20 people across art, automotive and telecommunications
- Created internal resources (guides, scripts, training materials) to systematize team workflows -- same process-improvement logic applied to development
- Recognized for leadership at Evoltis (Claro Argentina account) -- offered supervisory promotion based on performance

EDUCATION & CERTIFICATIONS

Frontend Development Career | ADA ITW | 2023-2026

9-month program | 4 modules | 72 classes

- Introduction to JavaScript
- Web Layout Mastery -- HTML + CSS
- Advanced Frontend -- REST APIs & Async Programming
- React -- Components, Hooks, State & SPA

Backend Development Career | ADA ITW | 2025-2026

9-month program | 4 modules | 77 classes

- Introduction to JavaScript

- Node.js Fundamentals
- RESTful API -- TypeScript, OOP, Express & CRUD
- Advanced Backend -- Databases, Sequelize, Firebase & Security

Esencia -- Generative AI & Product Development ADA ITW | Eidos Global | Google.org | 2026

Applied Generative AI ADA ITW | 2025

AI Tutor -- Samsung Innovation Campus 2026 Samsung | ADA ITW | Jun-Nov 2026

UX Design Google / Santander Academy | 2024

Frontend Development -- Project highlighted for Municipal scholarship ADA ITW | 2023

English for Work -- B1 Certificate British Council / Santander Academy

English for IT -- private weekly classes (ongoing) Current | B2-C1

Public Speaking & Communication UNC | 2012

Bachelor's Degree in History -- Research & Teaching track (incomplete) Universidad Nacional de Cordoba (UNC)

TESTIMONIALS

"I had the pleasure of following Camila's full journey at Ada since 2023, from a strong Fullstack Developer foundation in our Frontend and Backend programs to her growth toward AI via our Generative AI and Esencia tracks. Few people see that growth so closely, and fewer act on it: when Ada partnered with Samsung Innovation Campus to deliver an AI course, I didn't hesitate to choose Camila as Tutor. What convinced me was her technical depth and proactivity. Teaching Generative AI and Large Language Models takes more than Machine Learning knowledge and AI implementation skills: it takes real autonomy, which Camila showed consistently."

-- **Diana Osorio Rojas** | Executive Director | Ada ITW

"I've had the privilege of seeing Cami's professional growth up close, first as a student at Ada and now as a colleague at Samsung Innovation Campus. After following her journey through Fullstack Development and AI training programs, I participated in her selection as an AI Tutor due to her strong technical foundation, proactive mindset, and commitment to continuous learning. Since then, she has consistently demonstrated expertise in Generative AI, Large Language Models (LLMs), and Fullstack Development, while standing out for her autonomy, collaboration skills, and ability to support others."

-- **Rocio Decurgez** | Operations & Academic Coordinator | Ada ITW | Samsung Innovation Campus

"Llevamos casi tres años trabajando juntos y Camila siempre entregó con autonomía y criterio. Su trabajo contribuyó directamente al crecimiento de la cuenta a más de 1.7 millones de seguidores."

-- **Felipe Puerta** | CEO | Cementerio de Libros

"Quedó muy profesional tu página, hacés bien en estar orgullosa. No hace falta que te desee suerte con los conocimientos que demostraste, solo es cuestión de tiempo para que tengas buenos resultados. Te voy a tener en cuenta en caso que surgieran oportunidades."

-- **Carlos R. Decurgez** | Instructor Frontend | ADA ITW
